PROFILE

I am a highly dedicated and dynamic BIS Information Science graduate from the University of Pretoria. I have qualified for my degree with distinction and in record time. I am a flexible individual with a passion for working with ICTs to solve problems and achieve organizational objectives. I work with recordable information and knowledge and the ICTs and services that advance their management and use. IS is about getting the right information to the right person, at the right time, in the right format and to the right extent.

COMMUNITY INVOLVEMENT

I was a part of a team that carried out quality assurance tests for the Mathu educational mobile application. We ensured that the application was error and bug free, functioning at its best. This allowed learners to have a seamless user experience as they used it to practice and prepare for their exams.
